PROFESSIONAL SUMMARY

Data Analyst fresher skilled in SQL, Power BI, Excel, and Python with hands-on projects on 100K+ records. Strong in ETL, data modeling, and converting raw data into business-ready insights.

EDUCATION

B.Tech Computer Science and Engineering, JNTUK (2023-2027)

TECHNICAL SKILLS

SQL Server, T-SQL, Power BI, DAX, Excel, Power Query, Python (Basic), ETL, Data Cleaning, Data Modeling, Star Schema, GitHub, VS Code, Jupyter Notebook.

PROJECTS

Data Warehouse Project with SQL | SQL Server, ETL, Data Modeling | May 2026

- Engineered a 3-layer SQL Server warehouse integrating CRM/ERP sources via automated ETL stored procedures.
- Designed star-schema fact/dimension structures and applied deduplication plus validation checks for reliable analytics.

Weather Analytics Dashboard | Power BI, API Integration, DAX | Dec 2025 ([LINK](#))

- Built a Weather API-powered Power BI dashboard with Power Query ETL and star schema modeling across 6 cities.
- Developed 15+ DAX measures for AQI classification, dynamic color logic, and forecast-based city comparisons.

Weather Analytics Dashboard | Power BI, API Integration, DAX | Oct 2025 ([LINK](#))

- Developed an interactive Power BI dashboard suite for 2024 digital payment services (Insurance, Loans, Money Transfer, Recharge/Bills), tracking core KPIs such as total transaction amount, success vs. failure rate, service-wise performance, and monthly revenue trends.
- Performed failure-pattern and trend analysis using DAX measures and visual storytelling, highlighting top failure reasons (Wrong PIN, Server Error, Bank Denied) and peak revenue periods (March, July, September, December) to support data-driven business decisions.

CERTIFICATIONS

- Microsoft Power BI Data Analyst ([LINK](#))
- Advanced Excel ([LINK](#))

ACHIEVEMENTS

- Designed Medallion pipelines on 100K+ records and built SQL-backed dashboards that reduced manual reporting.
- Built interactive **Power BI dashboards integrated with SQL-based data models.**
